

PWB “Top Up and Trial Foil Pack”.

In response to special requests from some of our customers we are introducing a “Top-up and Trial Foil” pack of a variety of P.W.B. Foils.

Over the past 20 years, our customers have acquired a certain amount of knowledge and experience in using the various Foils we have introduced. The customers who have been with us from the beginning have experimented with all the Foils and are now at the stage where they have their favourite Foils, have accumulated a selection of their favourite Foils and only now need what they refer to as a “Top-up” Pack of the Foils.

In addition there are a number of newer customers who have not had the experience of experimenting with the earlier Foils, who have expressed a wish to try the earlier Foils, but who find the cost of a full length of each of the earlier Foils daunting. These are the customers who have requested a “Trial Foil” Pack of some of the Foils.

So, we are introducing a combination Foil Pack which we are calling the “Top-up and Trial Foil” pack.

The “Top-up and Trial” Foil pack includes a selection of P.W.B. Foils and is priced at £150.

The “Top-up and Trial Foil” pack of P.W.B. Foils consists of :-

One third of a length (i.e. 60 mm) of each of the following six Morphic Message Foils. X Film., Black 26., Blue Z., Comfort., Safe Hole., New Type Communication.,

One half of a length (i.e. 85 mm) of Real Foil.

One half of a length (i.e. 85 mm) of any TWO of the following Foils. You can chose which TWO Foils you would like a half a length of from the following list.

Freeze Effect Foil. (Supplied with its own specific cream)

Inside Foil.

Copper Foil. (Supplied with its own specific creams)

Aluminium Foil. (Supplied with its own specific creams)

Inverting Foil. (Supplied with its own specific creams)

Present Foil

Retro Foil. (Supplied with its own specific cream)

In addition to the selection of the different Foils, we are including a small amount of Morphic Green Cream. With the exception of the four Foils named above which have their own specific Creams, after strips of any of the other Foils have been attached to an object, then a tiny amount of the Morphic Green Cream is applied over each strip of Foil, both on the Foil strip and spreading over the Foil onto the object - interfacing the strip of Foil with the object.
