

PWB Morphic Link device

For Coins and Stamps

Following feedback from our customers trying out the initial PWB Morphic Link paperclips snap hook and key ring ID tags, we have found further devices that we can adapt to cover the areas that customers have highlighted.

Customers have asked how they can treat coins and postage stamps. So adapting a small plastic coin display container, by putting a PWB Morphic Link label on the inside and PWB rainbow foil on the outer body coins and stamps can now have the morphic link broken.

Various size Plastic coin holders are available.

23mm – 28mm - 30mm - 46mm

All of these are £10 each.

To stop the coin rattling around in the plastic coin holder a small piece of PWB treated blue tac is placed in the bottom of the container for you.
